

Technology Stack

Date	29/09/2026
Team ID	SWTID-2026-1297
Project Name	AI FAQ Assistant API
Maximum Marks	2 Marks

Define Your Technology Stack:

Identify the programming languages, frameworks, databases, front-end tools, back-end tools, and APIs that you will use to build your solution. A well-chosen technology stack ensures that your application is scalable, maintainable, and aligned with your project requirements.

Fill out the table below to detail the specific technologies chosen for each component of your architecture and provide a brief justification for your choice.

The AI FAQ Assistant API uses Node.js and Express.js for backend development, MongoDB and Mongoose for data storage, Git and GitHub for version control, and Google Gemini API for AI-powered FAQ and customer-support responses. Thunder Client is used for API testing and validation. The selected technologies provide a modular, maintainable, and scalable backend solution.

Technology Stack Details

S.No	Architecture Component / Layer	Technology Chosen	Justification / Purpose

1	Frontend / Client-Side	<i>No separate frontend – Thunder Client</i>	<i>Thunder Client is used as the API client for sending requests and testing the backend endpoints.</i>
2	Backend / Server-Side	<i>Node.js + Express.js</i>	<i>Used to build the RESTful backend API and handle HTTP requests, routing and server-side logic.</i>
3	Database / Data Storage	<i>MongoDB + Mongoose</i>	<i>MongoDB stores user and FAQ data, while Mongoose provides schema-based data modelling and database interaction.</i>
4	Cloud / Hosting / Deployment	<i>Localhost / Local Development</i>	<i>The current project is developed and tested locally on the development server.</i>

5	Version Control & CI/CD	<i>Git + GitHub</i>	<i>Git and GitHub are used for source-code version control, project management and repository storage.</i>
---	------------------------------------	---------------------	--

6	Third-Party APIs / Other Tools	<i>Google Gemini API</i>	<i>Provides AI-powered answer generation for FAQ and customer-support responses.</i>
